Transparency in Coverage — Machine-Readable Files

The Transparency in Coverage Final Rules require certain group health plans to disclose on a public website information regarding covered items and services for both in-network provider rates and historical out-of-network allowed amounts and billed charges in two separate machine-readable files (MRFs). This requirement arises under the amendment of the Public Health Service Act under the “Health Care Prices Revealed and Information to Consumers Explained Transparency Act,” also known as the “Health Care PRICE Transparency Act.”
